EDUCATION

BMS Institute of Technology & Management

Bachelor of Engineering in Electronics & Telecommunication Engineering, CGPA: 9.24

Bengaluru, India

2023 – 2027

Aragami PU College

Class 12 Science, Percentage: 89%

Bengaluru, India

2022 – 2023

PROJECTS

QNX Deterministic Security Monitor | C, QNX RTOS, Microkernel Architecture, IPC

- Designed a split-architecture security solution on a QNX Microkernel using strictly isolated C programs to mitigate hardware side-channel attacks.
- Developed a zero-overhead Mitigation Engine (Priority 63) triggered by native IPCs to instantly preempt and freeze compromised processes mid-instruction, preventing data exfiltration.

Secure Small Office Network Simulation | Cisco Packet Tracer, VLANs, Routing

- Designed and simulated a secure multi-department office network with VLAN-based segmentation, isolating Management, Sales, Engineering, and Guest traffic to enforce structured network access policies.
- Configured inter-VLAN routing, DHCP-based automatic IP allocation, and access control policies for segmented network communication.

Non-Invasive Biomarker Detection System | ESP32, Data Processing

- Developed a portable diagnostic system that extracts and processes real-time breath acetone telemetry as a biomarker to estimate blood glucose levels.
- Engineered an ESP32 microcontroller data pipeline to compute and visualize physiological metrics instantly.

IoT Intrusion Detection via Side-Channel Analysis | Raspberry Pi, Python, Edge AI

- Building a non-intrusive edge monitoring system utilizing hardware power side-channel analysis to detect malware, bypassing the need for software logs.
- Engineering an I2C data acquisition pipeline to sample current consumption every 0.2 seconds, generating a custom dataset to train real-time Edge AI classification models.

CERTIFICATIONS

Networking Basics | Cisco Networking Academy

- Completed foundational training in networking concepts including TCP/IP, IPv4/IPv6, routing, switching, and network troubleshooting.

Network Security | NPTEL (IIT Bombay)

- Completed a 12-week certification covering network attacks, secure communication protocols, and cybersecurity fundamentals.

EXTRACURRICULAR

Web Development Intern | Bhisma's Aero Pvt. Ltd., Bengaluru

- Developed and maintained web applications for aerospace industry client requirements.

AI Model Evaluator | Outlier

- Contributed 330+ hours of RLHF and SFT tasks to train enterprise LLMs, evaluating model outputs for factual accuracy and logical consistency.
- Performed quality evaluation of AI-generated outputs across Mathematics and multilingual domains.

TECHNICAL SKILLS

Programming Languages: C, Python, SQL

Tools & Software: Cisco Packet Tracer, Git, QNX Neutrino, VS Code, PostgreSQL

Embedded & Systems: ESP32, Raspberry Pi, RTOS
